

# Aviation Partners® High-Mach Blended Winglets™ are available as a retrofit for the Falcon 2000 series

## **Fast Facts**

### STC expected:

End of year 2007, with installations beginning immediately.

### Pre-STC price:

\$550,000 installed

### Range increase:

250-300 nautical miles

### Improved climb:

Higher initial cruise altitude  
Faster climb to altitude  
Improved second segment climb

### Installation downtime:

15 days or less.

The world's first High-Mach Blended Winglets, designed in collaboration with Dassault Falcon, boost performance and fuel savings for the Falcon 2000 family—with a Range increase up to 260NM.

Certification on the Falcon 2000 series is planned for end of year 2007. Blended Winglet retrofits for the Falcon 900 and 50 are planned for 2008.
