The world's first High-Mach Blended Winglets, designed in collaboration with Dassault, are now flying on more than 100 Falcon 2000 series aircraft, and standard equipment on the 900LX. Blended Winglets boost performance and fuel savings for the Falcon 900 family.

Blended Winglet retrofits are now certified for all in-service Falcon 900 series aircraft. Retrofits for the Falcon 50 series are planned for 2012.

Call us now to reserve your position for a Blended Winglet retrofit. Phone +1 206 762 1171.
